## 2006

Graduation class 2006? A year book? What the heck is this supposed to be?

I don't know how it feels to you — but do you still know all the people you met and learnt to know at last year's con? Well, here it is my job to know all — after all each one has to show up at my registration desk. But on other cons I cannot remember all the names and faces. So I think it might be a good idea to dig up and dust off the good old tradition of con booklets for our anniversary convention...

In the first part of the con booklet I intend to have a short review for each con passed, followed by one page for each participant with his/her contact details and photo. Plus a bit of free space that can be filled as liked in the best tradition of con booklets. \*g\*

The final price of this booklet is not fixed as of yet because I do not know how many do want to participate — but my personal upper limit is at 6 EUR (with ALL con members participating and colour cover).
